

The Humanity Project

Telling the Untold Story

*Thank you to participants who continue our conversations between meetings!
Sharing from our Nov. 2020 Padlet on the social construction of race:*

I was surprised to learn....

- Racial categories are made up. Definitions changed to benefit the system.
- The social construction of race was as deliberate as it was.
- White and non-white races were made up to segregate people of color and keep them down so we could inhumanely enslave them to our advantage.

I am beginning to wonder....

- Why my education of history is so sanitized? I am realizing that what I was taught is merely a narrow slice of a much bigger picture.
- I am amazed, yet not amazed, that the lies about race have been bought & sold so easily. I bought the lies...I am here and participating because I don't want to sell the lies.
